TABLE OF CONTENTS

to Volume 91, January–April 1979

ADAMS, JULIAN, THOMAS KINNEY, SUSAN THOMPSON, LORI RUBIN and ROBERT B. HELLING, Frequency-dependent selection for plasmid-containing cells of *Escherichia coli* 627–637

ANDERSON, ROGER W., Complementation of amoebal-plasmodial transition mutants in *Physarum polycephalum* 409–419

AVERY, P. J. and W. G. HILL, Variance in quantitative traits due to linked dominant genes and variance in heterozygosity in small populations 817–844

BREWEN, J. G. and H. S. PAYNE, X-ray stage sensitivity of mouse oocytes and its bearing on dose-response curves 149–161

CHAMPNEY, W. SCOTT, Localized mutagenesis for the isolation of temperature-sensitive mutants of *Escherichia coli* affected in protein synthesis 215–227

CHARLESWORTH, D. and B. CHARLESWORTH, Selection on recombination in a multi-locus system 575–580

CHARLESWORTH, D. and B. CHARLESWORTH, Selection on recombination in clines 581–589

CHUMLEY, FORREST G., ROLF MENZEL and JOHN R. ROTH, Hfr formation directed by Tn10 639–655

CHOURNEY, PREM S. and OLIVER E. NELSON, Interallelic complementation at the *sh* locus in maize at the enzyme level 317–325

COHEN, JOE D. and NORMAN R. EATON, Genetic analysis of multiple drug cross resistance in *Saccharomyces cerevisiae*: a nuclear-mitochondrial gene interaction 19–33

DOONER, HUGO K. and OLIVER E. NELSON, Interaction among *C*, *R* and *Vp* in the control of the *Bz* glucosyltransferae during endosperm development in maize 309–315

DRISCOLL, C. J., L. M. BIELIG and N. L. DARVEY, An analysis of frequencies of chromosome configurations in wheat and wheat hybrids 755–767

ELLIOTT, ROSEMARY W., Use of two-dimensional electrophoresis to identify and map new mouse genes 295–308

ELY, BERT, Transfer of drug resistance factors to the dimorphic bacterium *Caulobacter crescentus* 371–380

FELSENSTEIN, JOSEPH, A mathematically tractable family of genetic mapping functions with different amounts of interference 769–775

FINNERTY, VICTORIA and GEORGE JOHNSON, Post-translational modification as a potential explanation of high levels of enzyme polymorphism: zanthine dehydrogenase and aldehyde oxidase in *Drosophila melanogaster* 695–722

GARCIA-BELLIDO, A., Genetic analysis of the achaete-scute system of *Drosophila melanogaster* 491–520

GATTI, M., G. SANTINI, S. PIMPINELLI and G. OLIVIERI, Lack of spontaneous sister chomatid exchanges in somatic cells of *Drosophila melanogaster* 255–274

GENG, SHU, JAN DVORAK and PAUL SCHNEEMAN, A probability model for evaluating the randomness of the assortment of chromosomes during somatic reduction 565–573

GIANOLA, DANIEL, A. B. CHAPMAN and J. J. RUTLEDGE, Responses to selection for body weight in descendants of X-irradiated rats 627–645

GILLIES, C. B., The relationship between synaptonemal complexes, recombination nodules and crossing over in *Neurospora crassa* bivalents and translocation quadrivalents 1–17

GOCKE, ELMAR and THOMAS R. MANNEY, Expression of radiation-induced mutations at the arginine permease (*CAN1*) locus in *Saccharomyces cerevisiae* 53–66

HODGKIN, JONATHAN, H. ROBERT HORVITZ and SYDNEY BRENNER, Nondisjunction mutants of the nematode *Caenorhabditis elegans* 67–94

HUSKEY, ROBERT J., BARBARA E. GRIFFIN, PATRICIA O. CECIL and ANN M. CALLAHAN, A preliminary genetic investigation of *Volvox carteri* 229–244

HYNES, M. J., Fine-structure mapping of the acetamidase structural gene and its controlling region in *Aspergillus nidulans* 381–392

JEFFERY, DUANE E., Position effects at the hairy locus in *Drosophila melanogaster* 105–125

KARAM, J. D., M. LEACH and L. J. HEERE, Functional interactions between the DNA ligase of *Escherichia coli* and components of the DNA metabolic apparatus of T4 bacteriophage 177–189

KARLIN, SAMUEL and URI LIBERMAN, Central equilibria in multilocus systems. I. Generalized nonepistatic selection regimes 777–798

KARLIN, SAMUEL and URI LIBERMAN, Central equilibria in multilocus systems. II. Bisexual generalized nonepistatic selection models 799–816

KATZ, ALAN J., Estimation of fitness components in *Drosophila melanogaster*. II. Influence of reduced transmission frequency 359–368

KEPPY, D. O. and R. E. DENELL, A mutational analysis of the triplo-lethal region of *Drosophila melanogaster* 421–441

KIGER, JOHN A., JR. and ERIC GOLANTY, A genetically distinct form of cyclic AMP phosphodiesterase associated with chromomere 3D4 in *Drosophila melanogaster*.. 521–535

LACY, ROBERT C. and CAROL BECKER LYNCH, Quantitative genetic analysis of temperature regulation in *Mus musculus*. I. Partitioning of variance 743–753

LUBINSKY, SHARON and GLENN C. BEWLEY, Genetics of catalase in *Drosophila melanogaster*: rates of synthesis and degradation of the enzyme in flies aneuploid and euploid for the structural gene 723–742

LYTTLE, TERRENCE W., Experimental population genetics of meiotic drive systems. II. Accumulation of genetic modifiers of Segregation Distorter (*SD*) in laboratory populations 339–357

MACNAIR, MARK R., The genetics of copper tolerance in the yellow monkey flower, *Mimulus guttatus*. I. Crosses to nontolerants 553–563

MCCARRON, M., J. O'DONNELL, A. CHOVNICK, B. S. BHULLAR, J. HEWITT and E. P. M. CANDIDO, Organization of the rosy locus in *Drosophila melanogaster*: further evidence in support of a *CIS*-acting control element adjacent to the xanthine dehydrogenase structural element 275–293

MOERMAN, D. G. and D. L. BAILLIE, Genetic organization in *Caenorhabditis elegans*: fine-structure analysis of the *unc-22* gene 95–103

NAGYLAKI, THOMAS, The island model with stochastic migration 163–176

NASSAR, F., Frequency-dependent selection at the *Lap* locus in *Drosophila melanogaster* 327–338

OHTA, TOMOKO, An extension of a model for the evolution of multigene families by unequal crossing over 591–607

ORIAS, EDUARDO and EILEEN P. HAMILTON, Cytogamy: an inducible, alternate pathway of conjugation in *Tetrahymena thermophila* 657–671

PARKER, CHARLOTTE, DOROTHY GAUTHIER, ANN TATE, KATIE RICHARDSON and W. R. ROMIG, Expanded linkage map of *Vibrio cholerae* 191–214

PICARD, GEORGES, Non-mendelian female sterility in *Drosophila melanogaster*: principal characteristics of chromosomes from inducer and reactive origin after chromosomal contamination 455–471

PICARD, GEORGES and ALAIN PELISSON, Non-mendelian female sterility in *Drosophila melanogaster*: characterization of the noninducer chromosomes of inducer strains 473–489

RIPOLL, PEDRO and A. GARCIA-BELLIDO, Viability of homozygous deficiencies in somatic cells of *Drosophila melanogaster* 443–453

RUSSELL, LIANE B., Analysis of the albino-locus region of the mouse. II. Mosaic mutants 141–147

RUSSELL, LIANE B., W. L. RUSSELL and E. M. KELLY, Analysis of the albino-locus region of the mouse. I. Origin and viability 127–139

SANDLER, L. and JOSEPH O'TOUSA, Heterochromatic effects on the behavior of reversed acrocentric compound-*X* chromosomes in *Drosophila melanogaster* 537–551

TAKAHASHI, MIHOKO, Behavioral mutants in *Paramecium caudatum* 393–408

TAKANO, ISAMU and KENJI ARIMA, Evidence of insensitivity of the *α-inc* allele to the function of the homotheallic genes in Saccharomyces yeasts 245–254

TOH-E, AKIO and REED B. WICKNER, A mutant killer plasmid whose replication depends on a chromosomal "superkiller" mutation 673–682

WHELAN, WILLIAM L., ELMAR GOCKE and THOMAS R. MANNEY, The *CAN1* locus of *Saccharomyces cerevisiae*: fine-structure analysis and forward mutation rates ... 35–51

YOKOYAMA, SHOZO and MASATOSHI NEI, Population dynamics of sex-determining alleles in honey bees and self-incompatibility alleles in plants 609–626

YOUNGMAN, PHILIP J., DOMINICK J. PALLOTTA, BETSY HOSLER, GARY STRUHL and CHARLES E. HOLT, A new mating compatibility locus in *Physarum polycephalum* 683–693
